

# Quality Macola Utility Software from Leahy Consulting

Our software utilities were developed to improve productivity and streamline your workflow. Most are turn-key applications so you can start using them immediately.

- **Pulse Dashboard Reporting** - This dashboard reporting software extracts real-time sales & bookings, customer service, inventory, purchasing, production and MRP data to better manage your company's operations.
- **Item Master File Import/Export** - This Excel-based utility allows you to make mass additions, changes or copies of selected data in the item master and item/location files in minutes. (\$650)
- **Customer Price File Import/Export** - This Excel-based utility allows you to add, change or delete any of the eight Macola price code records. It also simplifies purging expired price code records.(\$650)
- **Production Tracking Dashboard Software** – This is designed for POP users who want tracking by operation, work center or machine but do not want to use Shop Floor Control. The price is \$4,995 plus customizations.
- **Bank Lock Box Cash Receipts Import** (ES) – Import customer lockbox receipts directly into the ES software. View all transactions, make changes and post them. The price is \$4,995 plus customizations.
- **Sales Forecast Import/Export** – This replaces Macola's Forecast Pro interface and can also be used with manual sales forecast spreadsheets. It imports your historical sales data into Excel, which is read by Forecast Pro or manually updated. Your new Forecast Pro forecast or manually updated forecast is then exported back into the Macola Master Scheduling database. (\$1,200)
- **Web Orders Import** – This utility imports website customer orders and creates Macola customer orders. It also writes back UPS tracking numbers for simplified tracking by the customer. The software is \$4,995 plus customizations.
- **Import Customer Orders from Excel Spreadsheets** – This utility imports customer orders that have been prepared in Excel by customers or sales personnel and creates Macola customer orders. The software is \$4,995 plus customizations.
- **General Ledger Budget Import/Export** – Simplify importing and exporting budget records. Create your new budget and make revisions. (\$995)

Flexibility is not needed and all utilities operate with Progression or ES unless noted.
